

OIL NEWS

FROM LOCAL AND SOUTHERN OKLAHOMA FIELDS

BILL KROHN

Important Tests Will Start Soon

Locations to Be Staked to the North and Southeast of Graham Production.

Two new locations of importance are due to be staked in the Graham district after the first of next year, one of which will be by the Cottonbelt Petroleum company on a tract three-eighths of a mile north of production in the northwest quarter of section 30, 2s-2w, while the other will be drilled by the J. H. Schermerhorn interests on a tract in section 1s, 2s-2w, one mile southeast of production.

Interesting Test

Of interest in the Graham field at the present time is the Magnolia Petroleum company's No. 1 on the J. H. Bennett farm, in the southeast of the southwest of the northwest quarter of section 31, 2s-2w, one fourth of a mile west of production, which is drilling at 2800 feet. This test encountered a pink shale and broken sand formation showing some oil at 2750 feet, similar to that found above the big pay in the producers of the field. The Magnolia company's No. 3 on the J. H. Bennett farm in the center of the northwest quarter of the northwest quarter of section 31, 2s-2w, east of the Tidal-Chatoe No. 1 is fishing for a lost ball at 1970 feet. Magnolia No. 2 on the J. H. Bennett farm, in the northeast of the northwest quarter of section 31, 2s-2w, is drilling in hard lime at 1670 feet.

Magnolia Petroleum company's No. 3 on the J. E. Bennett farm, in the center of the northeast of the southwest of the northeast quarter of section 31, 2s-2w, is cleaning out and snubbing about 10 barrels. Total depth of the hole is 2560 feet. Oil sand was drilled through at 2560-40 feet.

East Edge

Healdton Petroleum company's No. 1 on the Bennett farm, in the center of the southwest of the southeast of the northeast quarter of section 31, 2s-2w, is preparing to move back the rotary preparatory to drilling deeper. Total depth is around 2130 feet. The well has made several flows. Trouble with the hole forced the resumption of operations with the rotary. Healdton Petroleum company has not cased at 2741 feet in its No. 2 on the Meyer farm, in the center of the northeast of the northwest of the southeast quarter of section 31, 2s-2w, on a shell. The same operators are drilling at 400 feet in their No. 3 on the Meyer farm, in the center of the northwest of the northwest of the southeast quarter of section 31, 2s-2w. Healdton Petroleum company has started drilling in its No. 2 on the Burrows farm, in the center of the northwest of the southeast of the northeast quarter of section 31, 2s-2w.

Testing Sands in Stephens Wildcats

Two Important Tests Prepare to Test Favorable Oil and Has Showings.

Operators of the Aeco Oil company's wildcat on the Southern farm in the southeast of the southwest of the southeast quarter of section 3, 2s-4w Stephens county, have decided to plug back to 1,000 feet, install a "whip stock" and reduce drilling to test sands passed through during the original operations. The hole was drilled to a total depth of 1600 feet in a sand showing gas and some oil but the operators were never able to properly set the casing to test. This is the second hole to be drilled on the lease, the first having been drilled 700 feet to the northwest of the second location to a total depth of 2300 feet. Both wells were drilled with the rotary and operations will be resumed with the rotary on the second hole after it is plugged back. Sands which will be tested in the second hole were drilled through in the second hole at 1270-97 feet and at 1947-68 feet, both of which had good showings of gas and some oil. In the first hole a sand which showed oil and gas was drilled through at 1900 feet. This well also be tested in the second test if the upper sands do not warrant the shallower depth completion.

Location of the Aeco wildcat is about eight miles northwest of production in the Roberson field. The test has been taken over by Lloyd Stigler of Chickasha.

Tip Watts of Lindsey has started to drilling in the center of the north line of section 32, 2s-4w, Stephens county. Locations of this test is about two miles east of the Doyle field in the 1s-5w country, and is one fourth of a mile east of the Rushing et al test which was abandoned at around 1500 feet. The Rushing test passed through a gas showing at 1108 feet, a good oil showing at 1378 feet and at 1438 feet topped a broken sand and shale which showed some oil for a thickness of 50 feet, in which formation the test was abandoned. The Rushing people shot the pipe at around 1100 feet and gas bubbled out through the water and burned ten feet above the hole.

Josey Oil company is shut down at around 800 feet in the southwest of the southwest quarter of section 31, 4s-5w, until after the first of next year. Location of this test is about 12 miles southeast of the Chickasha gas district.

Hays et al are drilling at around 850 feet in the center of the southeast of the southeast quarter of section 13, 3s-2w, Garvin county.

Forster et al are rigging up the rotary for a test in the northwest of the northwest quarter of section 5, 3s-7w, about seven miles southeast of the gas production in 14, 4s-5w, Grady county.

New Completions Noted in Roberson District

Texas and Pacific Coal and Oil company has completed its No. 2 on the Lila James farm, in the southeast corner of the southeast of the northwest of the southwest quarter of section 12, 1s-3w, as a 17,000,000-foot gasser in two wells at 1294-94 feet and 1313-25 feet. The T.P. people have staked location for their No. 10 on the Pernell farm, in the northeast corner of the south half of the southeast quarter of section 9, 1s-2w.

T.P. No. 2 on the Pearce farm, in the northwest corner of the northwest of the northeast of the southwest quarter of section 13, 1s-3w, which came in as a 1100-barrel several weeks ago, is now making 350 barrels from sand at 1453 feet.

Magnolia Petroleum company's No. 1s on the S. H. Cowan farm, in the northeast of the southwest of the north west quarter of section 15, 1s-3w, is flowing 150 barrels from sand at 1055-31 feet.

Magnolia Petroleum company's No. 1 on the Cowan farm, in the northwest corner of the southwest of the southwest quarter of section 10, 1s-3w, is a 100-barrel in sand at 1543-68 feet. Same operators' No. 4 on the Richardson farm, in the southwest corner of the northwest of the southwest of the northeast quarter of section 16, 1s-3w, is good for 20 barrels in the 1000-foot sand. Same operators' No. 1 on the Orr farm, in the southwest corner of the northeast of the southeast of the north west quarter of section 16, 1s-3w, is making 150 barrels from sand at 1413 feet.

J. R. Shremmerhorn No. 1 on the Sparks farm, in the center of the southeast of the southwest of the southwest quarter of section 30, 2s-2w, is drilling at 1900 feet following completion of a fishing job. Claude Bell has spudded his No. 1 on the Dings-Bledsoe farm, in the center of the southwest of the southwest of the southeast quarter of section 31, 2s-2w. This well will be drilled with a combination rig and was started with the cable tools. The rotary tools are now en route to the location and are expected to arrive within the next few days.

Cottonbelt Petroleum company is trying to straighten a crooked hole with the rotary tools in its No. 1 on the Dunlap farm in the center of the southeast of the southeast of the northwest quarter of section 31, 2s-2w with the total depth of the hole at 2675 feet in sandy lime showing gas.

Sholom Alechem!

We take this opportunity to extend heartiest greetings and sincerest wishes for a happy and prosperous New Year to the members of the southern Oklahoma oil fraternity and all others connected with the petroleum world—the greatest of American industries. May the coming year mark an era of progress which will outshine the remarkable development which has been seen in the past. We desire to thank our many friends for the greatly appreciated co-operation which they have given us during the past year, and which has enabled us to maintain the high standard of our oil column.

There is a big future in store for oil development in southern Oklahoma. The prospective territory in this section of the state has barely been scratched and yet southern Oklahoma holds a most enviable position among the producing areas of the mid-continent field—a position won by the facts and figures of its past accomplishments as regards the productivity of its proven portions.

Center county is the diamond set in the golden environment which forms the backbone of Oklahoma's petroleum resources.

"To have an oil well in Center County is to have SOMETHING." Each year the truth of this slogan becomes more marked.

New Locations Are Staked at Comanche

Deep Lone Star Gasser Guages 27,500,000 Feet With 950 Pounds Rock Pressure.

Two new locations have been staked by the Magnolia Petroleum company in the Comanche district. They are: No. 1 on the Brown farm, in the northwest of the southwest of the northwest quarter of section 19, 2s-7w, one fourth of a mile southwest of production. The test will be drilled with cable tools. It is located one fourth of a mile from an abandoned well which was drilled by the Magnolia people two years ago but which resulted in a lost hole in a sand showing gas at 1600 feet. The other location is No. 1 on the Ruby Marks farm, in the northeast of the northeast of the southeast quarter of section 13, 2s-8w, offset to the Post et al well which was brought in last week as a 30-barrel in sand at 1897-1903 feet and extended the field one fourth of a mile to the northwest. The Magnolia-Marks No. 1 will be drilled with the rotary.

Guage of the production of the Lone Star Gas company's No. 2 on the Mart farm, in the northeast of the northeast of the southwest quarter of section 8, 2s-6w, registered 27,500,000 cubic feet with rock pressure of 950 pounds. Total depth of the hole is 3155 feet. The well is connected with the Lone Star gas line.

Magnolia Petroleum company has abandoned its No. 2 on the Farris farm in the northeast of the southeast quarter of section 26, 2s-6w with the total depth of the hole at 3800 feet in blue shale. The 1-inch casing was carried. This test passed up the shallower sands in search of a deeper pay.

Magnolia Petroleum company is drilling at 1400 feet in its No. 4 on ten Farris farm, in the southeast of the northeast of the southeast quarter of section 22, 2s-6w.

Power Plant Completed in the 1s-2w Territory

J. P. Hivick and company have completed their power plant in the 1s-2w country on the Ike Harmon farm, and have seven wells connected on the pump. The plant has a capacity of pumping about 40 wells. It was built by the Frick-Reid Supply company and include in its equipment a 15 H. P. Reed gas engine.

CUNNINGHAM WILL BE HELD FOR LACK FUNDS

ST. LOUIS—William L. Cunningham under indictment in New York on a charge of using the mails in a scheme to defraud who was scheduled to be taken east today, will be held in jail here until next week, it was announced this morning because the United States marshal's office has not sufficient funds to defray the transportation expenses.

Mrs. Minnie B. Church has purchased a fine farm southeast of the city and is rapidly getting the place in condition for a suburban home. Mrs. Church is the county home demonstrator and desired room at her home for her work than she formerly enjoyed closer to town.

1923 GREETINGS

We are glad to take this opportune time to thank the people of this community for their patronage in the past year 1922.

May the coming New Year bring happiness to you.

HERD-BAILEY COMPANY
HARDWARE

Big Gassers Producing in 2400-Foot Fox Sand

Report of the completion of the Magnolia Petroleum company's No. 6 on the Heffner-Mills farm, in the center of the northeast of the southwest of the northeast quarter of section 27, 2s-3w, shows it as having been brought in as a 40,000,000-foot gasser in sand at 2407-43 feet the deepest producing horizon in the Fox district. This well is offset on the east by one C. R. Smith No. 6 fee, in the northwest of the southeast of the northeast quarter of section 27, 2s-3w, which came in last week as a 44,000,000-foot gasser in the 2400-foot sand and had a rock pressure of 750 pounds. In the Fox district, the Empire Gas and Fuel company is drilling in its No. 12 on the Davis farm, in the northeast corner of the southeast of the northeast quarter of section 24, 2s-3w. Sand was topped at 2216 feet and the drill is still in it at 2240 feet. The well has made several flows and is showing up for a good producer.

The Ponton-Dennis No. 1 on the Carpenter farm, in the southwest of the southwest of the southeast quarter of section 22, 2s-3w, is drilling in a broken gas sand at 2060 feet which was topped at 1952 feet. This well is an east offset to the Franklin-Carpenter No. 1 north Fox extension.

Magnolia Petroleum company's No. 4 on the Heffner-Mills farm, in the southwest of the northeast quarter of section 2s-3w, is drilling on the plugs cemented at 2103 feet. The same operators are fishing for lost tools at 2590 feet in their No. 4 on the same lease.

Card of Thanks

We wish to thank our many friends for their loving kindness shown us in our greatest sorrow, the death of our husband, son and brother, especially do we thank you for the many beautiful floral offerings. We also thank the W. O. W. and each and every one that assisted us in any way.

Mrs. R. E. Frederick and family.
Mr. and Mrs. J. L. Fields.
Mr. and Mrs. Henry Frederick.
Mr. and Mrs. Jack Frederick.
Mr. and Mrs. Lee Daniels.

MAY HOLD TWO OF HERRIN TRIALS TOGETHER

MARION, Ill.—Possibility of holding two Herrin mine killings trials simultaneously was indicated today in a statement by State's Attorney Delos Duty that he was ready to start on the second case immediately if necessary.

Important Tests

Section 23-3s-3w.
Sturm-Phelan-Yoeng-Lester test on the Lester farm, in the northeast of the southeast quarter of section 23, 3s-3w, is drilling in red beds at 500 feet, carrying the 12 1/2 inch casing.

Northwest Berwyn
Stacy et al are building the derrick for their wildcat on the Suggs farm in the center of the northwest of the northeast of the northeast quarter of section 24, 3s-2e, in the northwest corner of the two-site of Berwyn. Cable tools will be used and the hole will be started with the 20-inch casing. It will be drilled to 3000 feet if necessary.

Love County
Ambassador Oil company's wildcat on the Gray farm, in the northeast of the northeast of the northeast quarter of section 9, 7s-1w, Love county, is reported as fishing at 915 feet.

Northwest Marietta
Hivick Oil and Development company's test on the Wilson farm, in the southeast of the northwest of the northeast quarter of section 11, 7s-2e, Love county, three miles northeast of Marietta, is in sandy shale at 1550 feet. The operators expect to set the 16-inch casing at about 1500 feet to shut out water from above. A good gas showing in shale was drilled through at around 1500 feet.

Northwest Graham
Magnolia Petroleum company is waiting on a steel nipple and is shut down at 1810 feet on a sand showing gas in its No. 1 on the Latham farm, in the southeast of the southeast of the southeast quarter of section 2s-3w, one and one fourth miles northwest of Graham production. The operators are trying to correct casing trouble.

North of Newport
Magnolia Petroleum company's test on the McCarty farm, in the southwest of the southeast of the southeast quarter of section 26, 3s-1w, north of Newport, is trying to drill by lost tools with the total depth of the hole at 1214 feet.

Southwest Lone Grove
J. C. Cooke Oil and Gas company on the McKown farm, in the center of the southwest of the southeast of the northwest quarter of section 34, 4s-1w, two miles southwest of Lone Grove, is drilling in blue shale at 1175 feet.

South Overbrook
J. C. Cooke Oil and Gas company on the Leule LeFlore farm, in the center of the northeast of the northwest of the northeast quarter of section 13, 6s-1e, Love county, one and one half miles south and west of Overbrook, is in blue shale at 1110 feet.

PITCHER STATUS TO BE SETTLED AT MEET

CINCINNATI—B. B. Johnson, president of the American League, August Herrman, president of the Cincinnati National League club, and "Rube" Benton, were to hold a conference in Herrmann's office here today, which, it was expected, would settle the question of Benton's status and his right to pitch for the Cincinnati club.

Rev. Cochran Visits Here
Rev. Frank Cochran of Pauls Valley, former associate pastor of the Broadway Methodist church was a visitor in the city Saturday while en route home from points in Texas where he spent Christmas.

Pennsylvania Oils Advance in Price

PITTSBURGH, Pa.—The price of Pennsylvania crude oil was advanced 25 cents to \$3.25 a barrel by the principal purchasing agencies here at the opening of the market today. Other advances of 25 cents a barrel were Cabell, \$2.11; Somerset, \$1.90; Somerset, light, \$2.12.
Coring at \$1.25 and Ragland at \$1.00 were unchanged.

Policeman Killed; Girl Attacked by Unknown Party

CHICAGO.—A policeman was killed, and one of three men who accosted and fired upon a party of high school students, slightly wounding a girl, was probably fatally shot here early today in the ensuing pistol fight with police. The high school students were returning from a dance at their school when the three men set upon them. One of the trio was said to have accosted Minnie Finkelstein, 17, the wounded girl, who resented his remarks. When the girl remonstrated, the man's two companions joined him and he then was reported to have begun firing. Miss Finkelstein was struck in the hip. Then the trio fled. William J. O'Malley, probationary policeman was shot as he gave chase to the men.

NOTICE
The meeting night of Ardmore Lodge No. 31, A. F. and A. M., has been changed to the first and third Tuesday nights in each month.
Gilbert Presnell, W. M.
G. O. Damsis, Sec.

Several farm wagons loaded with wool were in the city Saturday, and despite the fact it was a very rainy day, the wool was eagerly purchased by citizens in anticipation of a cold snap with possibility of a gas shortage.

Boys Arrested
TALOGA.—Following the theft of several small articles from houses in the vicinity of Raymond, C. C. Jones, sheriff of Dewey county, has made several arrests of boys thought to have been implicated.

348 to 350.5 gravity	1.59
350 to 352.5 gravity	1.59
352 to 354.5 gravity	1.59
354 to 356.5 gravity	1.59
356 to 358.5 gravity	1.59
358 to 360.5 gravity	1.59
360 to 362.5 gravity	1.59
362 to 364.5 gravity	1.59
364 to 366.5 gravity	1.59
366 to 368.5 gravity	1.59
368 to 370.5 gravity	1.59
370 to 372.5 gravity	1.59
372 to 374.5 gravity	1.59
374 to 376.5 gravity	1.59
376 to 378.5 gravity	1.59
378 to 380.5 gravity	1.59
380 to 382.5 gravity	1.59
382 to 384.5 gravity	1.59
384 to 386.5 gravity	1.59
386 to 388.5 gravity	1.59
388 to 390.5 gravity	1.59
390 to 392.5 gravity	1.59
392 to 394.5 gravity	1.59
394 to 396.5 gravity	1.59
396 to 398.5 gravity	1.59
398 to 400.5 gravity	1.59
400 to 402.5 gravity	1.59
402 to 404.5 gravity	1.59
404 to 406.5 gravity	1.59
406 to 408.5 gravity	1.59
408 to 410.5 gravity	1.59
410 to 412.5 gravity	1.59
412 to 414.5 gravity	1.59
414 to 416.5 gravity	1.59
416 to 418.5 gravity	1.59
418 to 420.5 gravity	1.59
420 to 422.5 gravity	1.59
422 to 424.5 gravity	1.59
424 to 426.5 gravity	1.59
426 to 428.5 gravity	1.59
428 to 430.5 gravity	1.59
430 to 432.5 gravity	1.59
432 to 434.5 gravity	1.59
434 to 436.5 gravity	1.59
436 to 438.5 gravity	1.59
438 to 440.5 gravity	1.59
440 to 442.5 gravity	1.59
442 to 444.5 gravity	1.59
444 to 446.5 gravity	1.59
446 to 448.5 gravity	1.59
448 to 450.5 gravity	1.59
450 to 452.5 gravity	1.59
452 to 454.5 gravity	1.59
454 to 456.5 gravity	1.59
456 to 458.5 gravity	1.59
458 to 460.5 gravity	1.59
460 to 462.5 gravity	1.59
462 to 464.5 gravity	1.59
464 to 466.5 gravity	1.59
466 to 468.5 gravity	1.59
468 to 470.5 gravity	1.59
470 to 472.5 gravity	1.59
472 to 474.5 gravity	1.59
474 to 476.5 gravity	1.59
476 to 478.5 gravity	1.59
478 to 480.5 gravity	1.59
480 to 482.5 gravity	1.59
482 to 484.5 gravity	1.59
484 to 486.5 gravity	1.59
486 to 488.5 gravity	1.59
488 to 490.5 gravity	1.59
490 to 492.5 gravity	1.59
492 to 494.5 gravity	1.59
494 to 496.5 gravity	1.59
496 to 498.5 gravity	1.59
498 to 500.5 gravity	1.59
